## An introduction to Hindenburg Narrator

### About the handbook

## 1 Getting started

### 1.1 My first Narrator audio book

A single preparation: select the interface language

Arrange windows and toolbars

Enter session properties

Create the headers in the Manuscript window

Set the parameters for recording

Check loudness

Start the take and record the book

Export the audio

### 1.2 Further basic learning topics

Workspace and tracks

Replay and select audio for editing

Insert audio, shifting up existing audio (Alt+Shift+R)

Frequently used basic key commands

### 1.3 Activities and options by production stage

## 2 Narrator's components

### 2.1 Workspace, Contents and Manuscript

Arranging windows

Workspace

The Table of Contents window

Manuscript

What the colors of the Manuscript window mean

### 2.2 Favorites and Clipboard

### 2.3 Markers and navigation points

Overview table of marker types

### 2.4 Other windows

System Monitor

Current program version and updates

### 2.5 More about the toolbars

Tools toolbar

Bookbar

Narration bar

Transport bar – record section

Transport bar – loudness meter

Transport bar – navigation section

Counter bar

### 2.6 The session file and its sound file folder

Naming and saving a session

What is in the session

How to back up a session

### 2.7 How Narrator's components relate

General data flow diagram

## 3 Obtaining the manuscript

### 3.1 Ways to obtain chapter headers

A Narrator file (.nhsx) provided by the publisher

An ePub document  
Bookbar buttons  
A prepared .docx document  
An HTML document  
A Hindenburg Narrator template file

### **3.2 Using the Bookbar**

General way to use the Bookbar  
Customizing the Bookbar using the Styles page  
Adding header lines wherever we want  
Removing superfluous header lines

### **3.3 Manuscripts for DAISY books**

DAISY and page numbering  
DAISY and synchronizing audio with pages  
DAISY and elaborate book structures

### **3.4 Reusing an HTML file as a structure template**

### **3.5 Reusing a session as a template**

Saving as a template, opening a template

## **4 Preparations for recording**

### **4.1 Parameters and work preferences**

Audio options  
Interface options  
Advanced options

### **4.2 Session Properties**

Metadata for the export product  
Title field  
Multimedia type field  
Handling tracks  
Export settings  
Storing properties for reuse

### **4.3 Narration track settings**

Gain and play volume sliders  
Finding the right gain level  
Recording and balancing stereo sound  
Splitting stereo into mono

## **5 Record and synchronize**

### **5.1 Audio display modes All, Branch and Leaf**

Record the book in Leaf mode  
Using the Right arrow key  
Response to Right arrow in All versus Leaf mode

### **5.2 How to supplement missing audio**

Alt+Shift+R  
The Record Selection function

### **5.3 Synchronizing text and audio**

Synchronizing during narration  
How to prevent breaking synchronization  
How to synchronize an interview with its transcript

### **5.4 Creating an ePub with audio**

Preparing the ePub text  
How to define and apply a style

To see the styles: View Structure

### **5.5 Recording the source text**

Recording a PDF or a printed document

Recording a full text .docx document

Recording an ePub text

### **5.6 Reading clauses for games, commercials or IVRs**

The Excel source document containing the clauses

Improving recorded audio

Exporting the clauses

Filenames and clause names

## **6 Review, clean, restore**

### **6.1 Listening and viewing**

Scrubbing

Playing audio

Zooming

### **6.2 Removal and insertion**

Remove audio with X or Delete?

Remove audio by means of Ctrl+Q and Ctrl+W

Insert audio using Ctrl+I or paste using Ctrl+V

Inserting and removing space between the audio

Replace a synchronized chapter's audio in Leaf mode

Remove any type of navigation point

Swapping synchronized chapters - is that possible?

### **6.3 Restore synchronization and audio**

Prevent removal of navigation points

Restore chapter navigation points that were lost

Adjust and protect chapter navigation points

Restore both a lost header text line and its navigation point

Restore removed audio

Restore deactivated In- and Out-markers

Restore the session's sound storage folder name

### **6.4 Cleaning the audio**

Remove keyboard clicks

Replace clutter with roomtone

Trimming a region

### **6.5 Review using comment markers**

Manage comment markers

Comment markers or cue points?

Sharing comment markers with other people

## **7 Editing the audio**

### **7.1 Regions, selections, navigation**

What a region is and what it does

Region properties, region names

Skip to regions using Shift+Left and Shift+Right

The marquee: skip to the next object in time

Select and group multiple regions

Raising and lowering the gain of regions

### **7.2 Room tone pauses**

Silence or roomtone?

Many short room tone clips or a single long one?

How to create room tone pauses  
Insert pauses in a multi-track situation  
Close a gap between regions with triple click

### **7.3 Fading**

Basics: F or the mouse  
Remove fades  
More complex fades  
Fade using Shift+Ctrl+Down / +Up  
Using fades to suppress clutter

### **7.4 Effects: equalize, compress, filter**

Hear and see the effects  
What each effect does  
Setting the equalizer  
The Loudness Meter for measuring sound levels

### **7.5 Using voice profiles for consistency**

Create and apply a voice profile

## **8 Assemble, beautify, standardize**

### **8.1 Using Clipboard and Favorites**

Exchanging clips in- and externally  
Finding the clip you are looking for  
Importing clips to the Clipboard  
Copy and reuse clips from previous sessions  
Frequently used Clipboard and Favorites keys

### **8.2 Adding music**

Enriching audiobooks with music and sound effects  
Handling multiple tracks and clips  
Track operation modes active, armed, selected  
Track name, audio file name, region name  
Cross-fade over two tracks  
Synchronize with sound on other tracks  
Master Track

### **8.3 Standardizing to meet publisher requirements**

Overview table  
Automatic markup  
Automatic pause correction  
Automatic phrase detection

### **8.4 Consolidating audio**

Consolidation basics  
Some precautions  
Selecting regions and starting the consolidation

### **8.5 Previewing a book**

## **9 Export**

### **9.1 Export options**

Export everything, only audio, a track or a selection  
Formats and validations before exporting

### **9.2 Ways of naming export files**

### **9.3 Exporting to Audiobook format**

Audiobook export settings preparation  
Encoding, bitrate, sample rate, joint stereo  
Splitting audio by chapter

Splitting audio by time  
Validation check for ACX or Findaway Voices  
Automatic correction for ACX and for Findaway Voices

#### **9.4 Exporting a series of clauses**

#### **9.5 Exporting to DAISY format**

#### **9.6 Exporting to ePub format**

#### **9.7 Exporting as stereo audio**

#### **9.8 WAVE-copies and batch exports**

Create additional uncompressed copies

Composing an export batch

Batch export overview window

#### **9.9 Removing unused files: Session Clean-up**

## **10 The NLS Narrator edition**

### **10.1 Session properties**

Info metadata

Styles and classifications

Managing classifications

Book Export settings

Retaining settings as the default

### **10.2 Reading and synchronizing**

Synchronizing while reading

Synchronizing imported audio

Marking audio for exclusion

Standardization to NLS requirements

Digital Talking Book requirements

### **10.3 Export as an NLS book**

### **10.4 NLS Quick Reference Guide**

## **11 Quick Reference Guides**

### **11.1 Universal basic quick guide**

### **11.2 Product typical quick guides**

Audiobook quick guide

Video Game Clauses quick guide

DAISY book quick guide

ePub quick guide

Audio only quick guide

## **12 Lists and indexes**

### **12.1 Key commands**

Shortlist of frequently used commands

Comprehensive list of standard key commands

How to customize key assignments

### **12.2 List of figures**

### **12.3 Index**
